

Supplement: Tracking Standardized Test Performance Across Grade Levels in Southern 14 Schools

For more information on how these data are produced and what they represent, please refer to Chapter IV of the *21st Century Workforce: Southern Illinois* report, page 102.

These charts represent data for the Southern 14 area as a whole, each of the three sub-regions (Northern, Central, and Southern), and for each county in the region. Within counties, charts are included for unit school districts, i.e. school districts that contain each of the grade levels in consideration.

In all cases, the scores indicated are weighted according to enrollment in the districts represented by each chart.

Percentages of Students at Successive Testing Levels Who Met or Exceeded State Standards, 2003
